CADUCEUS: Remote Arbeit Machine

Mok Young Bacq

May 2010

The Concept

Since 07.2009 I got a part-time job, namely “Mobile Game Service Monitoring”. Every weekends from 10:00 until 03:00, each hours I must push the buttons of three cellular phones, to check the network service of mobile game company whether it works well or not. So it is my Job.

Thanks to this Job, I could buy materials, tools, motors, other need things, and Coffee too. But I wanted to travel abroad. Then a problem came to me. With this Job I could get the money for airplane tickets and in-habitations in abroad. But ironically because of this Job I was not able to travel abroad, cause I had to push the buttons of cellular phones “in the country: in South Korea”. The Job is called “Mobile” Game Service Monitoring, but only mobile in the country. Well, there is cellular phone roaming service but probably it costs more than my wages.

I wanted to travel, and also wanted not to be unemployed. Consequently I developed this idea; making a Remote Arbeit Machine, with this I will be able to work wherever where I am.

Mostly I made this remote arbeit machine “CADUCEUS”, during the actual working in weekends. I worked for the money and I made the machine simultaneously for the travel. After the successful development actually I traveled to the Mexico City in summer 2009, and there I did the Job through the CADUCEUS for three weeks without big problems.

The System

The machine “CADUCEUS” is simple and primitive, that pushes the buttons of three cellphone, instead of my fingers. That’s all. Because I don’t push the buttons by my fingers, but through Joystick to CADUCEUS, I can push the buttons everywhere, i.e. everywhere I can work. Finally I could remove the regional limit.

Exhibition

Photos of the Exhibition in Leejungseop museum openstudio in Jan. 2010, Jeju island South Korea.

Painting

During the realization of CADUCEUS, I worked also with following paintings. These Paintings are also conceptually linked with the idea of CADUCEUS. Virtually I'm willing to exhibit the machine, paintings, and drawings all together in a place like a theatre.

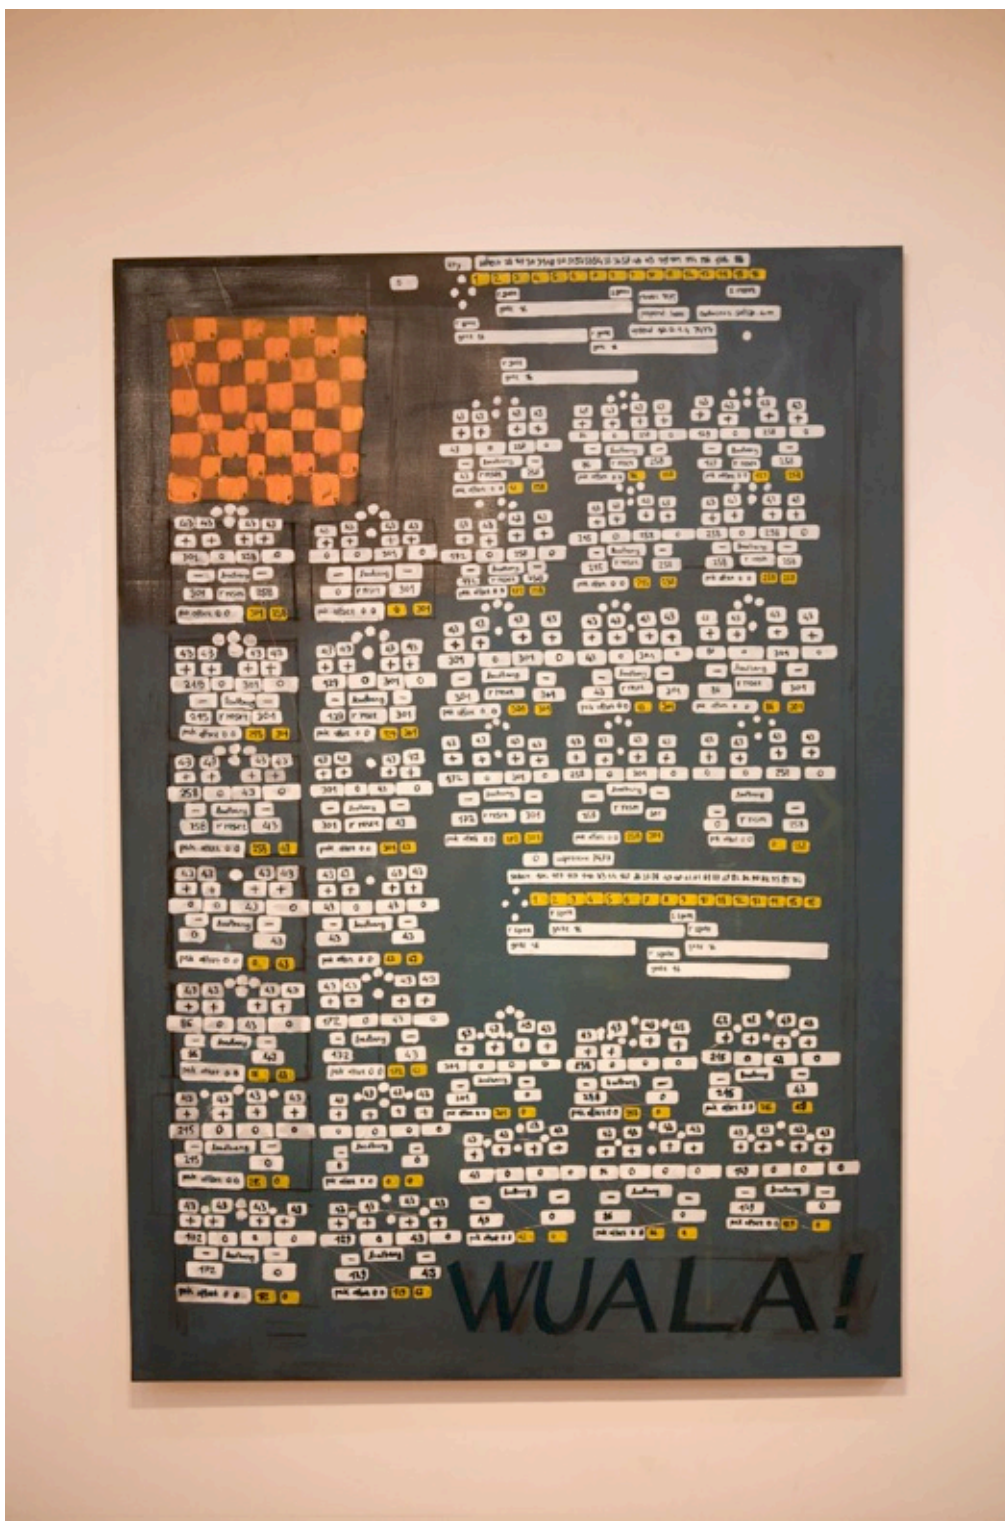

»Karambolage y geHackt«
264 x 264 CM, Acrylic, oil on canvas, 2010

»La Ola del Expresso«
224 x 112 CM, Mixed on canvas, 2009

»Liebe zum Dritt«
100 x 75 CM, Oilpastel, Indian ink on paper, 2009

»WUALA! Schach«
112 x 162 CM, Mixed on canvas, 2010

»Auf'm Klo«
89 x 130 CM, Oil on canvas, 2009

Drawings

Bowl Hygein

Mortar & pestle

helix

Caduceus

A greek cross

Rod of Asclepius

Conical-Measure

Aphorisms

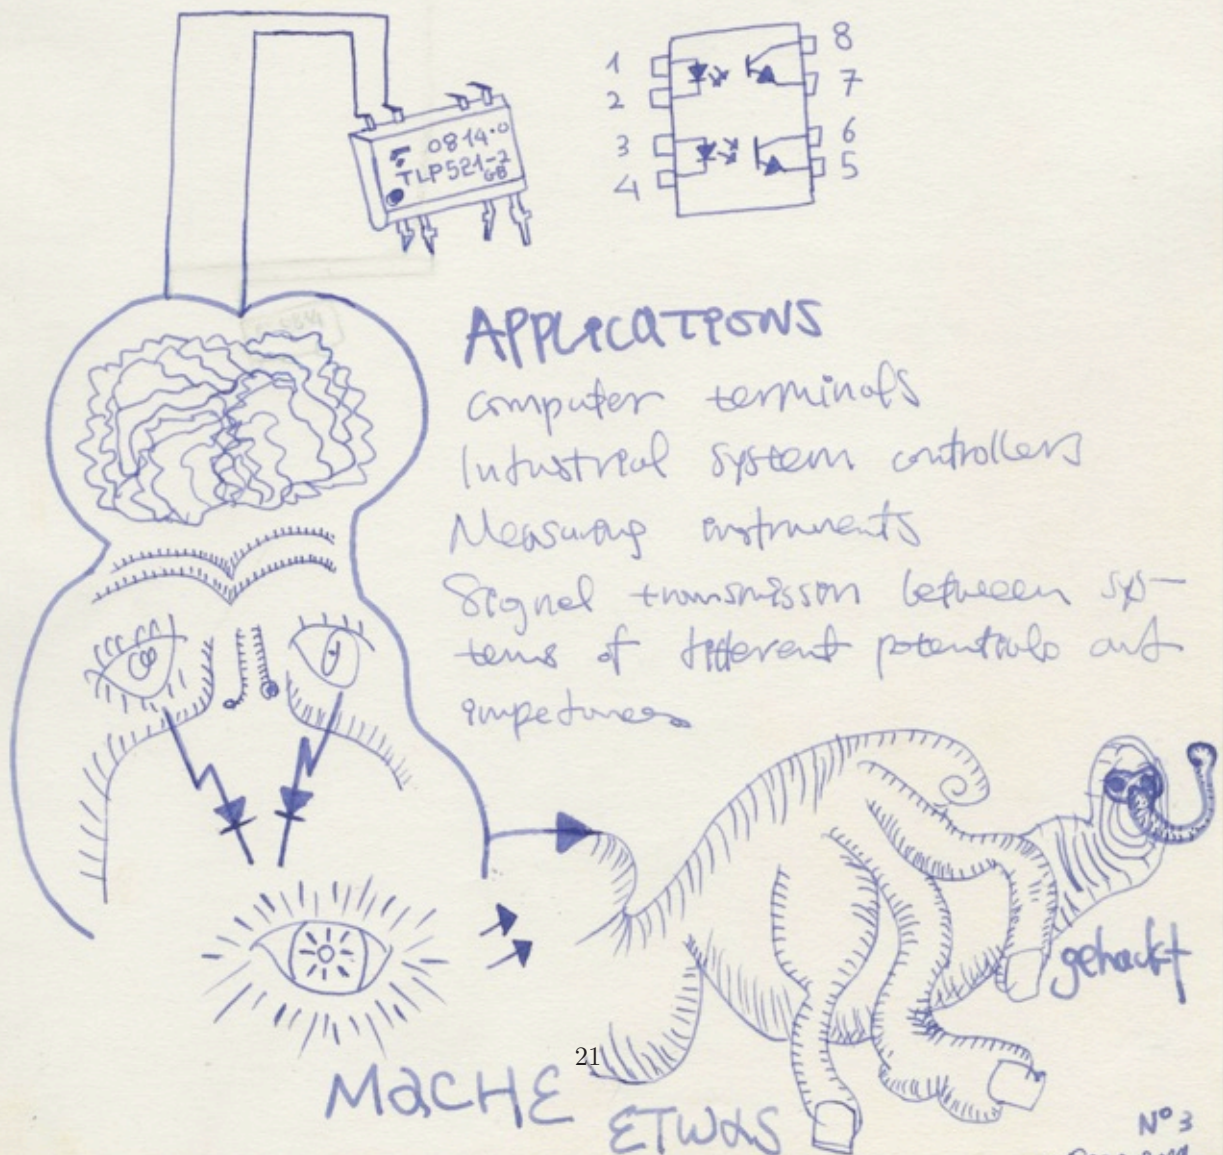

13. Aprilo. 2009

A handwritten signature in blue ink, consisting of several stylized, overlapping loops and a horizontal line crossing through them.

DESCRIPTION

The TLPS21, TLPS21-2, TLPS21-4 series of optically coupled isolators consist of infrared light emitting diodes and NPN silicon photo transistors in space efficient dual in line plastic packages.

APPLICATIONS

- Computer terminals
- Industrial system controllers
- Measuring instruments
- Signal transmission between systems of different potentials and impedances

Handwritten arithmetic exercises on a grid background, organized into columns and rows. The exercises involve simple addition and subtraction of numbers, often with multiple digits and carrying/borrowing. Some numbers are underlined or boxed to indicate specific steps or results.
