

Crary Typewriter, 53 Crosby Street, New York.

Finer work, lighter touch and greater speed than ever before attained on a typewriting machine. Does all work done on the ordinary typewriter, and in addition, writes on the largest book of record or smallest memorandum book. Writes on paper or card-board 18 x 36 inches, writing a line 30 inches in length. Writes on the ruled line—any ruling—filling out law blanks, insurance policies and all large public documents. Makes all fractions, double letters, mathematical signs and a great variety of borders, scrolls and fancy work. Manifolds from ten to twenty copies with perfect alignment, having the work constantly in sight, and weighs but ten pounds.
